Subject: **Memorial Drive Greenway Corridor Project, Block 5**
217 Martin Luther King Jr. Drive and 234 & 238 Memorial Drive
Atlanta, Fulton County, Georgia
MACTEC Project: 6305-06-0496.03

Dear Mr. Brown:

MACTEC Engineering and Consulting Inc. (MACTEC), is pleased to submit this report of our Phase I Environmental Site Assessment for properties located within Block 5 of the Memorial Drive Greenway Corridor Project which include 217 Martin Luther King Jr. Drive and 234 & 238 Memorial Drive in Atlanta, Fulton County Georgia. The purpose of our services was to identify environmental concerns, recognized environmental conditions and business environmental risks.

This report is intended for the use of City of Atlanta and its agent, the Atlanta Development Authority, subject to the contractual terms agreed to for the City's Sustainable Brownfield Redevelopment Project, funded through EPA Brownfield Assessment Grant. Use of this report for purposes beyond those reasonably intended by City of Atlanta, the Atlanta Development Authority and MACTEC will be at the sole risk of the user.

This report presents project information, which includes survey procedures and limitations, along with our findings, conclusions and recommendations. We appreciate your selection of MACTEC for this project and look forward to assisting you further on this and other projects. If you have any questions, please do not hesitate to contact us.

Sincerely,
MACTEC ENGINEERING AND CONSULTING INC.

1.0 EXECUTIVE SUMMARY

PROPERTY NAME: Memorial Drive Greenway Corridor Project, Block 5
LOCATION: 217 Martin Luther King Jr. Drive and 234 & 238 Memorial
Drive, Atlanta, Georgia

Based on the data collected during the assessment, our findings and conclusions are summarized as follows:

1.1 ON-SITE

The subject site consists of one noncontiguous property and two contiguous properties located within the block bound by Martin Luther King Jr. Drive to the north, Hill Street to the east, Memorial Drive to the south and Moore Street to the west in Atlanta, Fulton County Georgia. The properties are owned by Mr. Thurman Anderson and separated by a strip of vacant land.

The individual properties are 0.43-acres (Parcel A), 0.07-acres (Parcel B), and 0.16-acres (Parcel C), in size and addressed as 217 Martin Luther King Jr. Drive and 234 and 238 Memorial Drive, respectively. Parcel A is developed with a one-story warehouse building that is currently utilized for storage by the property owner. The remaining parcels are vacant, with the exception of some billboards along the northern and eastern boundaries of Parcel C. Hereafter, the one noncontiguous property and two contiguous properties (Parcels A, B and C) will be referred to as the subject site, unless otherwise noted. Kudzu growth over some areas of the subject site obscured ground surface conditions. Additionally, a lack of lighting in the building on Parcel A made observations difficult.

According to Mr. Anderson, an approximately 600-gallon gasoline underground storage tank (UST) is currently located in the northeastern corner of Parcel A. This UST was formerly utilized by a parcel delivery company which occupied the parcel from approximately the late 1950s to the early 1980s. Vent pipes associated with the UST were observed. This UST represents a REC to the subject site based on its potential to have leaked gasoline into the subsurface.

Storage inside the building on parcel A appeared to primarily consist of paper waste, clothes, scrap metal, old vending/gaming machines, office furniture and tools. Additionally, two 5-gallon

containers of roof tar, approximately five boxes of florescent light tubes, a five gallon container of non-asbestos dry wall, an old refrigerator compressor, printer toner, an ice maker and small quantities of paint were observed. Several ice freezers (unknown quantity), electrical wiring and an empty 55-gallon drum labeled Valvoline were observed around the perimeter of the building. No significant staining was observed in the vicinity of these items. Mr. Anderson reported that the wiring has been stripped from the building by vagrants and burned onsite for the purpose of extracting the copper.

Based on historical sources reviewed, Parcel A of the subject site consisted of residential property from at least the late 1800s through the 1940s. Two stores operated from the eastern portion of the property in the 1930s and 1940s. The Parcel was redeveloped with the existing building in the 1950s and occupied by a parcel delivery company from that time until the early 1980s. The site was purchased by Tristar Properties in 1986 and subsequently improved with two additional offices and necessary repairs. Mr. Anderson began renting the site in early 1989 and then purchased the property later that year. Throughout his occupation of the site, Mr. Anderson has reportedly utilized the property for miscellaneous storage including paper, clothes and game machines. Ice was also manufactured at the facility in the 1990s. Mr. Anderson indicated that he performed most of the maintenance on the machines, but a contractor would come and switch out refrigerants on an as-needed basis. Mr. Anderson indicated that he has not disposed of any chemicals on the subject site and is not aware of any significant leaks or spills.

Parcel B was occupied by a residential dwelling in the northern portion from at least the mid 1880s to the late 1940s and a residential dwelling in the southern portion from at least the mid 1880s to the mid 1980s. A residential dwelling was erected on Parcel C in the late 1800s and was removed by the mid 1970s. Both of these properties have remained vacant since the time these dwellings were removed. Mr. Anderson purchased these properties between 2001 and 2003.

The subject site was not listed on the regulatory databases reviewed for our assessment.

The UST represents a REC to Parcel A of the subject site based on its potential to have leaked gasoline into the subsurface. Additionally, although limited in extent, past wire burning on site

represents a potential environmental concern to the subject site based the potential for heavy metals to have leached into the subsurface.

There are no indications that the past or current uses of Parcels B or C have created environmental contamination of the site or its surroundings.

1.2 OFF-SITE

Forty-two facilities were listed within the ASTM specified search radii. The closest facility, Kelly Clutch Company, is located approximately 100 feet west of the subject site and is listed as a small quantity generator for ignitable wastes in 1988. There are no recorded violations at the facility to date. Although this facility is located in an interpreted sidegradient position in relation to the subject site, past and present uses (>50 years) of regulated substances at this property represents a REC based on its close proximity. The mattress factory facility is located approximately 300 feet northeast of the site. This facility is listed as a State Notifier based on detection of trichloroethylene in groundwater in 1998 at levels of 1,400 ppb and 130 ppb. Due to its partial location in the site's upgradient watershed, the facility is judged to represent a REC. Based on their distances and/or hydrologic positions, none of the remaining off-site facilities are judged to represent RECs relative to the subject site.

Parcel A is separated from Parcel B and C by a vacant lot. Otherwise, the subject site is surrounded by Martin Luther King Jr. Drive and a Conklin Metals Facility to the north, Hill Street and a restaurant to the east, Memorial Drive, EDS School, vacant lots and a BP Station to the south and Moore Street and Kelly's Clutch Company to the west. Historically, industrial facilities along the railroad have existed north of the site and a school south of the site since at least the mid 1880s. Residential properties surrounded the remaining portions of the site until commercial facilities began to emerge in the 1940s.

Current and/or historical use of the properties north of the site for metal works and other types of manufacturing represents RECs to the subject site based on their long history of industrial operations (>100 years), past likely use of regulated substances and full or partial location in the site's upgradient watershed.

1.3 CONCLUSIONS

Based on the information made available to MACTEC or obtained during the assessment of the subject property, MACTEC concludes that:

- The presence of a UST on Parcel A represents a REC based on its potential to have leaked gasoline into the subsurface. However, if the UST was taken out of service prior to November 1984, only the owner or operator at the time would retain regulatory liability for a release, including off-site impacts. The current owner is only aware that the UST has not been used since his acquisition of the property in 1989. Therefore, we could not determine whether the UST was used after 1984. As such, MACTEC recommends the UST be properly closed by removal prior to acquisition of the property, if practicable, to avoid ownership of the tank and possible future liability for a historical release.
- Current and past use of the western adjacent property for car repair and past and current industrial use of the facilities to the north represents RECs to the subject site based on their proximity, full or partial upgradient position and the potential for regulated chemicals to have been released into groundwater which could have migrated onto the subject site.
- MACTEC recommends that a limited invasive testing program be conducted at the subject site to further evaluate the potential for on-site soil impacts. Based on the results of soil testing, a decision can then be made whether to check for groundwater impacts from the on-site sources. Consideration could further be given at that time to expanding any groundwater testing program to also evaluate the potential for groundwater impacts from historical off-site activities.
- MACTEC recommends that the debris observed both inside and outside the building on Parcel A be removed and properly disposed of off site, prior to acquisition of the property. An environmental professional should be contacted if any significant staining or odor is observed during their removal.

- The on-site building should be surveyed for asbestos containing materials prior to any renovation or demolition activities.

2.0 INTRODUCTION

City of Atlanta and its agent, the Atlanta Development Authority, have retained MACTEC Engineering and Consulting (MACTEC), to provide environmental consulting services at the subject property. MACTEC has completed a Phase I Environmental Site Assessment at Block 5 (217 Martin Luther King Jr. Drive and 234 & 238 Memorial Drive properties) of the Memorial Drive Greenway Corridor Project in Atlanta, Georgia.

The purpose of our services was to identify environmental concerns, recognized environmental conditions and business environmental risks in connection with the property, based on readily available information and site observations.

This assessment has been conducted using funds made available through the City of Atlanta 2005 EPA Brownfield Assessment Grant. Verbal authorization to conduct this assessment was received from Garnett Brown, the City's Project Manager for its EPA Brownfield Assessment Grant on May 31, 2006. The assessment was performed substantially as outlined in our email to Ellen Wickersham on June 8, 2006.

2.1 BACKGROUND

City of Atlanta through its agent, the Atlanta Development Authority, has requested that MACTEC perform a Phase I Environmental Site Assessment for the subject site, using EPA Brownfield Assessment Grant funds. This site forms part of the Memorial Drive Greenway Project, a proposed one-mile linear park between Memorial and Martin Luther King Jr. Drives linking the State Capitol Complex on the western boundary with the Historic Oakland Cemetery on the east (Figure 4). The project was endorsed in the Memorial Drive-Martin Luther King Jr. Drive Area Revitalization Study, completed in May of 2001 for the City of Atlanta and the Atlanta Empowerment Zone Corporation.

2.3 PROCEDURES

The Phase I Environmental Site Assessment was performed using guidance from the American Society for Testing and Materials (ASTM) document ASTM E 1527-00.

The following services were provided for the assessment:

- A qualitative hydrogeologic evaluation of the site and vicinity using both published topographic and geologic maps and area observations to characterize the area drainage;
- A review of available documents, maps, aerial photographs and interviews with knowledgeable persons to evaluate past land uses;
- A review of available environmental reports published by state and federal agencies to determine if the site or nearby properties are listed as having a present or past environmental problem, are under investigation or are regulated by state or federal environmental regulatory agencies;
- A site and adjacent property reconnaissance for obvious indications of present or past activities which have or could have contaminated the site;
- Preparation of this report presenting our findings and conclusions.

2.4 QUALIFICATIONS

The findings and opinions presented are relative to the dates of our site work and should not be relied on to represent conditions at substantially later dates.

The opinions included herein are based on information obtained during the study and our experience. If additional information becomes available which might impact our environmental conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted. If this assessment included a review of documents prepared by others not subcontracted to MACTEC, it must be recognized that MACTEC has no responsibility for the accuracy of information contained therein.

Although this assessment has attempted to identify the potential for environmental impacts to the subject property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree or extent of contamination, if any, at the site.

ASTM E 1527-00 defines a “recognized environmental condition” as: “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

A business environmental risk is an environmental condition which can have an environmentally driven impact on the business associated with the current or planned use of a parcel of real estate. Recognized environmental conditions and business environmental risks which warrant follow-up assessment are termed environmental concerns in this report.

3.0 SITE SETTING

Understanding of a site's physical setting is important to the recognition of environmental impacts to the property.

3.1 GENERAL DESCRIPTION

The subject site consists of one noncontiguous property and two contiguous properties located within the block bound by Martin Luther King Jr. Drive to the north, Hill Street to the east, Memorial Drive to the south and Moore Street to the west in Atlanta, Fulton County Georgia. The subject site consists of three parcels that are 0.43-acres (Parcel A), 0.07-acres (Parcel B), and 0.16-acres (Parcel C), in size and addressed as 217 Martin Luther King Jr. Drive and 234 and 238 Memorial Drive, respectively. Parcel A is developed with a one-story warehouse building that is currently utilized for storage by Mr. Thurman Anderson, the property owner. The remaining parcels are vacant. Hereafter, the two contiguous properties and one noncontiguous property (Parcels A, B and C) will be referred to as the subject site. The site lies topographically in an area of gently rolling terrain. Average rainfall in the area is approximately 52 to 54 inches per year.

3.2 HYDROGEOLOGY

A consideration of surface and subsurface drainage and geology are of interest since they provide an indication of the direction that contaminants, if present on-site or off-site, could be transported. The term "upgradient" refers to a location hydraulically upstream.

MACTEC reviewed the following information in regard to the geology and hydrogeology of the site and surrounding area:

- Topographic Map, 7.5-Minute Series, Northeast, Southeast, Northwest and Southwest Atlanta, Georgia Quadrangles, dated 1997, published by USGS;
- Topographic Map, City of Atlanta and Vicinity, US Coast Guard and Geodetic Survey and City of Atlanta Mapping Divisions, dated 1928, Sheet 36 and 37;
- Geologic Map of Georgia, dated 1976, published by K.I. McConnell and C.E. Abrams, Georgia Department of Natural Resources;
- Georgia Average Annual Rainfall Map, United States Department of Agriculture, dated 1992; and

- Wetlands Interactive Mapper, U.S Fish and Wildlife Service, obtained from National Inventory Website www.wetlandsfws.er.usgs.gov.

3.2.1 Geologic Setting

The property is located in the Piedmont Geologic Region, an area composed of ancient igneous and metamorphic rocks. The site is mapped as being underlain by the Clarkston Formation which consists of sillimanite-garnet-quartz-plagioclase-biotite-muscovite schist interlayered with hornblende-plagioclase amphibolite. The residual soils present in this geologic area have been formed by in-place chemical and physical weathering of parent rock types. The typical soil profile consists of clayey soils near the ground surface transitioning to sandy silts and silty sands that generally become harder with depth to the top of the parent rock.

3.2.2 Surface Drainage

According to the 1997 United States Geologic Survey (USGS) Topographic Map of Northwest Atlanta, Georgia, the subject site is located on the southern side of an east to west trending ridge, which crests approximately 500 feet north of the site. A main railroad line runs along the ridge. The ground surface elevations of the subject site, based on the 1997 topographic map, ranges from approximately 1,020 feet above mean sea level (msl) in the northern and eastern portions of the site to 1,010 above msl in the southern portion of the site. Elevations are similar in the 1928 topographic map reviewed. Based on our observations, the current grades appear to slope gently downward toward the south and southwest, such that natural drainage over the site is generally toward the south or southwest.

The upgradient watershed of the site is interpreted to extend to the ridgeline near elevation 1,030 feet and encompass or partially encompasses three large industrial complexes that were constructed prior to the 1920s.

3.2.3 Groundwater

In the Piedmont Geologic Region, groundwater generally occurs under water table conditions and is stored in the overlying mantle of residuum and in the structural features (i.e., joints, fractures, faults) present in the underlying rock. Recharge to the water table occurs primarily through precipitation infiltrating the upper soils and percolating downward, under the influence

of gravity, to the groundwater table. Typically, the water table is not a level surface, but a subdued reflection of the land surface. Depth to the water table is variable, being dependent on many factors which include: the amount of rainfall, the permeability of the soil, the extent of fracturing in the underlying rock, and the amount of groundwater being pumped in the area.

Groundwater generally flows in directions subparallel to the ground surface slopes and under the influence of gravity toward points of discharge such as creeks, swamps, drainage swales or pumped groundwater wells. Based on our review of the topographic maps, we interpret the natural groundwater flow across the site to be generally in a southerly to southwesterly direction.

3.2.4 Wetlands

We evaluated site conditions for the presence of wetland areas using an on-line query of the “Wetlands Interactive Mapper” made available by the U.S. Fish and Wildlife Service, National Wetlands Inventory web site. Wetlands are defined as areas that are sufficiently saturated by surface or groundwater to support a prevalence of vegetation adapted for saturated soil conditions. Based on a review of the interactive mapper, there are no designated wetlands located on the subject property.

4.0 REGULATORY INFORMATION

MACTEC contracted Environmental Data Resources to perform a search for regulatory information as contained in Appendix C. This regulatory records search is based on information published by State and Federal regulatory agencies and is used to evaluate if the site or nearby properties are listed as having a past or present record of actual or potential environmental impact. Please note that regulatory listings include only those sites which are known to the regulatory agencies at the time of publication to be (1) contaminated, (2) in the process of evaluation for potential contamination, or (3) regulated.

EPA NATIONAL PRIORITIES LIST (NPL) Dated April 2006 (date of last EDR contact 05/05/06)

The Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) established the National Priorities List (NPL) of federal "superfund" sites. These are the contaminated sites that have been assigned a high ranking, in terms of potential public health effects, by the EPA.

- The site does not appear on the NPL.
- There are no facilities listed on the NPL within a one-mile radius of the site.

EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS) LIST Dated February 2006 (date of last EDR contact 03/21/06)

The CERCLIS list identifies documented and suspected contamination sites throughout the nation which were not ranked high enough to be listed on the NPL.

- The site does not appear on CERCLIS.
- There are no facilities listed on CERCLIS within a one-half mile radius of the site.

FEDERAL CERCLIS NFRAP Dated February 2006 (date of last EDR contact 03/21/06)

NFRAP is the EPA database of former CERCLIS sites where “no further remedial action is planned” under CERCLA.

- The site does not appear on the NFRAP list.
- There are no adjoining properties listed on NFRAP.

RESOURCE CONSERVATION & RECOVERY INFORMATION SYSTEM (RCRIS) Dated March 2006 (date of last EDR contact 04/27/06)

RCRIS is the EPA database of facilities that generate, transport, store, or dispose of hazardous wastes. Generators are found on the Notifiers list. Treatment, Storage and Disposal facilities are found on the TSD list, and TSD facilities requiring corrective actions are found on the CORRACTS list.

- The site does not appear on the RCRIS list.
- There are no facilities listed on the RCRIS TSD list within a one-half mile radius of the site.
- There are no facilities listed on the RCRIS CORRACTS list within a one mile radius of the site.
- There is one adjacent facility listed on the RCRIS Notifiers (generators) list.

Facility Name	Address	Location
Kelly's Clutch Service Company	210 Memorial Drive Atlanta, GA 30312	Approximately 100 feet west of subject site; sidegradient

Note: Kelly's Clutch Service is listed as a small quantity generator of ignitable wastes in 1988. There are no recorded violations at the facility; however, the facility is judged to represent a REC due to its close proximity and long term use of regulated substances.

EMERGENCY RESPONSE NOTIFICATION (ERNS) SYSTEM LIST Dated December 2005
(date of last EDR contact 04/26/06)

The ERNS list is a list of hazardous material spills reported to various State agencies.

- The site does not appear on the ERNS list.

LANDFILL LIST Dated January 2006 (date of last EDR contact 05/30/06)

Lists of active and inactive landfills, artificial fills, and disposal sites are maintained by the Georgia Department of Natural Resources. The landfill listing does not include unpermitted landfills or dumps.

- The site does not appear on the landfill list.
- There are no properties listed on the landfill list within a one-half mile radius of the site.

LEAKING UNDERGROUND STORAGE TANK (LUST) LIST April 2006 (date of last EDR contact 04/11/06)

The Leaking Underground Storage Tank list is a listing of UST systems within the state of Georgia which have reported releases of UST contents. This list is maintained by the State of Georgia Environmental Protection Division.

- The site does not appear on the LUST list.
- There are 10 facilities listed on LUST within a one-half mile radius of the site.

Facility Name	Address	Location
United Business Group	245 Memorial Drive Atlanta, GA 30312	Approximately 100 feet south of subject site; sidegradient
Shell Food Mart	387 Hill Street Atlanta, GA 30312	Approximately 800 feet southwest of subject site; sidegradient

Facility Name	Address	Location
Capitol Homes	316 Terry Street Atlanta, GA 30312	Approximately 800 feet east of subject site; separate watershed
Georgia Building Authority	197 Decatur Street Atlanta, GA 30303	Approximately 1,000 feet east of subject site; separate watershed
Frontier Communications Intern	349 Decatur Street Atlanta, GA 30312	Approximately 1,000 feet north--northwest of subject site; separate watershed
Former Gasoline Station Site	363 Memorial Drive Atlanta, GA 30312	Approximately 1,100 feet south of subject site; downgradient
Georgia Building Authority Motor	1 Martin Luther King Jr. Drive Atlanta, GA 30334	Approximately 1,300 feet east of subject site; separate watershed
GBA Police Station	1 Martin Luther King Jr. Drive Atlanta, GA 30334	Approximately 1,600 feet east-northeast of subject site; separate watershed
Fred E Rimer Co Inc.	307 Cherokee Avenue Atlanta, GA 30312	Approximately 1,600 feet east-southeast of subject site; sidegradient
Hugh Spalding Children's Hospital	35 Jessie Hill Jr. Drive Atlanta, GA 30303	Approximately 1,600 feet east-southeast of subject site; separate watershed

Note: Due to their distances and/or hydrologic positions in relation to the subject site, the above mentioned facilities are not judged to represent RECs relative to the subject site.

REGISTERED STORAGE TANK LIST Dated February 2006 (date of last EDR contact 04/10/06)

The Registered Storage Tank List is a listing of underground storage tank systems which are registered with the State of Georgia Environmental Protection Division.

- The site does not appear on the Registered Storage Tank list.
- There is one adjacent facility listed on the Registered Storage Tank list.

Facility Name	Address	Location
United Business Group	245 Memorial Drive Atlanta, GA 30312	Approximately 100 feet south of subject site; sidegradient

Note: Due to its distances hydrologic position in relation to the subject site, the above mentioned facility is not judged to represent a REC relative to the subject site.

HAZARDOUS SITE INVENTORY (HSI) LIST Dated July 2005 (date of last EDR contact 06/09/06)

The HSI is a list of sites in Georgia known or suspected of having had a release of a regulated substance above reportable quantity.

- The site does not appear on the HSI list.
- There are three properties listed on the HSI within one mile of the site.

Facility Name	Address	Location
Larkin Coils	519 Memorial Drive Atlanta, GA 30312	Approximately 2,900 feet east of subject site; separate watershed
Scripto Plant & Office Complex	435 Houston Street Atlanta, GA 30312	Approximately 4,000 feet northeast of subject site; separate watershed
Aramark Uniform Services	670 Dekalb Avenue Atlanta, GA 30307	Approximately 5,100 feet east-northeast of subject site; separate watershed

Note: Due to their distances and hydrologic positions in relation to the subject site, the above mentioned facilities are not judged to represent RECs relative to the subject site.

STATE HSRA NOTIFIERS Dated April 2006 (date of last EDR contact 04/03/06)

State Notifiers are sites in Georgia which notified the EPD of a release of a regulated substance pursuant to HSRA, but the concentrations were calculated to be below established threshold levels and, therefore, were not ranked high enough to be listed on the HSI.

- The site is not a State Notifier.
- There are 26 facilities listed as a State Notifier within a one-mile radius of the site as summarized below.

Facility Name	Address	Location
Mattress Factory	290 Martin Luther King Drive Atlanta, GA 30312	Approximately 300 feet northeast of subject site; partially upgradient
Atlanta Steam Head Plant	130 Martin Luther King Drive Atlanta, GA 30312	Approximately 800 feet west of subject site; sidegradient

Southern GE Company	263 Decatur Street Atlanta, GA 30302	Approximately 1,000 feet north-northwest of subject site; separate watershed
Decatur Street Property	217-349 Decatur Street Atlanta, GA 30312	Approximately 1,100 feet north-northeast of subject site; separate watershed
Capital Homes	89 Memorial Drive Atlanta, GA 30312	Approximately 1300 feet west of subject site; separate watershed
160 Edgewood Avenue	160 Edgewood Avenue Atlanta, GA 30303	Approximately 2,800 feet north-northwest of subject site; separate watershed
Larkin Coils	519 Memorial Drive Atlanta, GA 30312	Approximately 2,900 feet east of subject site; separate watershed
159-215 Auburn Avenue	159-215 Auburn Avenue Atlanta, GA 30303	Approximately 3,100 feet north-northwest of subject site; separate watershed
Suntrust Storage/Parking Facility	Auburn Avenue, NE Atlanta, GA	Approximately 3,100 feet north-northwest of subject site; separate watershed
Lot-International Boulevard	Between Courtland and Peachtree Atlanta, GA 30303	Approximately 3,500 feet northwest of subject site; separate watershed
Not Reported	534 Decatur Street Atlanta, GA 30312	Approximately 3,500 feet east-northeast of subject site; separate watershed
Vacant Lot	Garnet and Pryor Street Atlanta, GA 30303	Approximately 3,800 feet west of subject site; separate watershed
Beaudry Ford	141 Piedmont Road Atlanta, GA 30303	Approximately 3,900 feet north of subject site; separate watershed
City of Atlanta Board of Education	210 Pryor Street Atlanta, GA 30334	Approximately 4,000 feet west of subject site, separate watershed
Peachtree Center Assemblage	Tract 5, Parcel 28 Atlanta, GA 30302	Approximately 4,100 feet north-northwest of subject site; separate watershed
Dynamic Metals, Inc	548 Edgewood Avenue Atlanta, GA 30312	Approximately 4,100 feet northeast of subject site; separate watershed
Peachtree Street Site	64 Peachtree Street Atlanta, GA 30312	Approximately 4,300 feet northwest of subject site; separate watershed
Georgia State University Property	70 Broad Street Atlanta, GA 30303	Approximately 4,300 feet northwest of subject site; separate watershed
Chavez Downtown Properties	International @ Courtland Atlanta, GA 30302	Approximately 4,500 feet north-northwest of subject site; separate watershed
Bank of Nova Scotia Site	International Boulevard Atlanta, GA	Approximately 4,500 feet north-northwest of subject site; separate watershed
Imperial Parking	89 Cone Street Atlanta, GA 30303	Approximately 4,900 feet northwest of subject site; separate watershed

State Farm Mutual Insurance Company	202 Courtland Street Atlanta, GA 30303	Approximately 4,900 feet north-northwest of subject site; separate watershed
Georgia Blueprint Company	119 Luckie Street Atlanta, GA 30303	Approximately 5,000 feet northwest of subject site; separate watershed
Aramark Uniform Services	670 Dekalb Avenue Atlanta, GA 30307	Approximately 5,100 feet east-northeast of subject site; separate watershed
System Parking, Inc.	293 Courtland Street Atlanta, GA	Approximately 5,200 feet north-northwest of subject site; separate watershed
Auburn Avenue Warehouse	659 Auburn Avenue Atlanta, GA 30312	Approximately 5,200 feet northeast of subject site; separate watershed

Note: The mattress factory facility is located approximately 300 feet northeast of the site. The facility is listed as a State Notifier based on detection of trichloroethylene in groundwater in 1998 at levels of 1,400 ppb and 130 ppb. Due to its partial located in the site's upgradient watershed, the facility is judged to represent a REC. Due to their distances and/or hydrologic positions in relation to the subject site, the remainder of the above referenced facilities are not judged to represent RECs relative to the subject site.

BROWNFIELDS LIST Dated January 2006 (date of last EDR contact 06/07/06)

The Brownfields Public Record lists properties where response actions under the Georgia Hazardous Site Reuse and Redevelopment Act are planned, ongoing or completed.

- The site is not listed on the Brownfields list.
- There is one facility listed on the Brownfields list within a ½ mile radius of the site.

Facility Name	Address	Location
229 Grant Street	229 Grant Street Atlanta, GA 30308	Approximately 1,300 feet northeast of subject site; separate watershed

Note: Due to its distance and hydrologic position in relation to the subject site, the above mentioned facility is not judged to represent a recognized environmental condition relative to the subject site.

OTHER LISTINGS

MACTEC reviewed reports of spills listed on the Right to Know Network (RTK-NET) in order to see if there had been any environmental incidents at the subject property or in the immediate surrounding area. No incidents had been reported.

Thirty-seven non-geocoded sites were identified during the list search. Non-geocoded sites are those sites which are not mapped by EDR due to poor or inadequate geocoding information. Six of the listed facilities appear to be located within the ASTM specified search radii; however, none are interpreted to be located in the upgradient watershed of the subject site. Given the addresses of the remaining non-geocoded sites, it is reasonable to assume that they are not located within the upgradient watershed of the subject site.

Numerous facilities were identified on the EDR Zip Code Scan Report. Given the addresses for these facilities, it is reasonable to assume that none of these facilities are located in the limited upgradient watershed of the subject site. For more information regarding these sites and orphan facilities see the EDR Regulatory Search Information in Appendix C.

5.0 SITE INFORMATION AND USE

MACTEC performed a site and vicinity reconnaissance, conducted interviews and reviewed available information in order to evaluate the uses of the site and surrounding properties and to evaluate activities of potential environmental concern. The following sources are referenced:

- Topographic Map, City of Atlanta and Vicinity, US Coast Guard and Geodetic Survey and City of Atlanta Mapping Divisions, dated 1928, Sheet 36 and 37;
- Aerial photographs, dated 1938, 1940, 1960, 1968, 1972, 1986 and 1989; obtained from EDR;
- Aerial photographs, dated 1993 and 2002; obtained from USGS via www.terraserver.com;
- Sanborn Maps, dated 1886, 1892, 1899, 1911, 1931, 1950 and 1978; obtained from EDR;
- Atlanta City Directories, Polk City Directories and Haines City Directories, 1922-2005 in approximately five year increments; obtained from EDR; and
- Interview with Mr. Thurman Anderson, current property owner, on June 13, 2006.

Ms. Betsy Gillies and Ms. Melissa Bystedt, environmental professionals with MACTEC experienced in environmental site assessments, conducted site and area visits on June 13, 2006. The site reconnaissance was performed on foot and the area reconnaissance was a driving tour on public-access routes.

5.1 CURRENT SITE USE

The subject site consists of one noncontiguous property and two contiguous properties located within the block bound by Martin Luther King Jr. Drive to the north, Hill Street to the east, Memorial Drive to the south and Moore Street to the west in Atlanta, Fulton County Georgia. The properties are owned by Mr. Thurman Anderson and separated by a strip of vacant land.

The individual properties are 0.43-acres (Parcel A), 0.07-acres (Parcel B), and 0.16-acres (Parcel C), in size and addressed as 217 Martin Luther King Jr. Drive and 234 and 238 Memorial Drive, respectively. Parcel A is developed with a one-story warehouse building that is currently utilized

for storage by the property owner. The remaining parcels are vacant, with the exception of some billboards along the northern and eastern boundaries of Parcel C. Hereafter, the one noncontiguous property and two contiguous properties (Parcels A, B and C) will be referred to as the subject site, unless otherwise noted. Kudzu growth over some areas of the subject site obscured ground surface conditions. Additionally, a lack of lighting in the building on Parcel A made observations difficult.

The following conditions were specifically assessed for their potential to create environmental concern.

5.1.1 Storage Tanks

No indications of aboveground storage tanks (AST) were observed on the subject site.

According to Mr. Anderson, an approximately 600-gallon gasoline underground storage tank (UST) is currently located in the northeastern corner of Parcel A. This UST was formerly utilized by a parcel delivery company which occupied the parcel from approximately the late 1950s to the early 1980s. Mr. Anderson indicated that he has not used the UST since he acquired the property in 1989. Vent pipes associated with the UST were observed. The UST represents a REC to the subject site based on its potential to have leaked gasoline into the subsurface.

5.1.2 Hazardous and Petroleum Products Containers/Drums

Two 5-gallon containers of roof tar, approximately five boxes of florescent light tubes, a five gallon container of non-asbestos dry wall, an old refrigerator compressor, printer toner, an ice maker and small quantities of paint were observed. Several ice freezers (unknown quantity), electrical wiring and an empty 55-gallon drum labeled Valvoline were observed around the perimeter of the building. No significant staining was observed in the vicinity of these items. Mr. Anderson reported that the wiring has been stripped from the building by vagrants and burned onsite for the purpose of extracting the copper.

5.1.3 Heating and Cooling Fuels and Chemicals

The building on Parcel A is not currently heated or cooled. Ceiling suspended gas units were observed inside the building. Chemicals associated with heating and/or cooling were not observed on-site.

5.1.4 Solid Waste

Solid waste is not currently generated on the subject site. However, approximately six cars, scrap metal, I-beams, PVC, an engine part, hot water tank, aluminum frames, and wooden pallets were observed on Parcel A. Litter was observed scattered throughout parcels B and C.

5.1.5 Sewage Disposal/Septic Tanks

The area is serviced by the City of Atlanta municipal system. According to Mr. Anderson, no septic tanks are located on site.

5.1.6 Hydraulic Equipment

No hydraulic equipment was observed on the subject site.

5.1.7 Contracted Maintenance Services

No contracted maintenance services are currently provided to the site.

5.1.8 Electrical Transformers

No electrical transformers were observed on the subject site.

5.1.9 Water Supply and Wells

Water is supplied to the area by the City of Atlanta municipal system. No wells were observed or are known to be located on the subject site.

5.1.10 Drains and Sumps

No drains or sumps were observed on the subject site.

5.1.11 Pits, Ponds, Lagoons and Surface Waters

No pits, ponds, lagoons or surface waters were observed on the subject site.

5.1.12 Staining/Corrosion

Some apparent water staining was observed inside the building. No evidence of other staining or corrosion was observed on the site.

5.1.13 Stressed Vegetation

Indications of stressed vegetation were not observed on the subject site.

5.1.14 Odors

No unusual odors were detected during the site reconnaissance.

5.2 PAST SITE USE

Based on historical sources reviewed, Parcel A of the subject site consisted of residential property from at least the late 1800s through the 1940s. Two stores operated from the eastern portion of the property in the 1930s and 1940s. The Parcel was redeveloped with the existing building in the 1950s and occupied by a parcel delivery company from that time until the early 1980s. The site was purchased by Tristar Properties in 1986 and subsequently improved with two additional offices and necessary repairs. Mr. Anderson began renting the site in early 1989 and then purchased the property later that year. Throughout his occupation of the site, Mr. Anderson has reportedly utilized the property for miscellaneous storage including paper, clothes and game machines. Ice was also manufactured at the facility in the 1990s. Mr. Anderson indicated that he performed most of the maintenance on the machines, but a contractor would come and switch out refrigerants on an as-needed basis. Mr. Anderson indicated that he has not disposed of any chemicals on the subject site and is not aware of any significant leaks or spills.

Parcel B was occupied by a residential dwelling in the northern portion from at least the mid 1880s to the late 1940s and a residential dwelling in the southern portion from at least the mid 1880s to the mid 1980s. A residential dwelling was erected on Parcel C in the late 1800s and was removed by the mid 1970s. Both of these properties have remained vacant since the time these dwellings were removed. Mr. Anderson purchased these properties between 2001 and 2003.

5.3 SURROUNDING LAND USE

Nearby property usage could potentially impact the surface and subsurface conditions of a property. Developing a history of past to present uses or occupancies can provide an indication of the likelihood of environmental concern.

5.3.1 North

The subject property is bound to the north by Martin Luther King Jr. Drive, formerly known as Hunter Street. Across Martin Luther King Jr. Drive is a Conklin Metal Industries, a manufacturer of sheet metal, and Nicks Greek Restaurant. Further northwest is a large vacant

industrial building and farther northeast is another large industrial facility that is currently occupied by Eye Drum Gallery and lofts. Beyond these facilities is a railroad line.

Residential properties and a church occupied properties immediately north of the site from at least the mid 1880s through the 1940s; however, by the 1950s, most of the residences were removed and replaced by parking lots associated with expansion of the Conklin facility. A store or restaurant has occupied the northwest corner of Martin Luther King Drive and Hill Street since at least the 1930s. Farther north were industrial type businesses that included a scrap iron junk yard in the early 1910s and then a Conklin sheet metal manufacturing facility that has operated farther north of the site since at least the mid 1920s. This facility is located approximately 200 feet north of the subject site in an interpreted upgradient position.

The area farther northeast of the site was developed with residential properties from at least the 1880s to 1940s, until an industrial facility was erected and occupied by various businesses including a Union Compress Warehouse in the mid 1880s, a Mattress factory from the early 1890s to at least the late 1970s. This facility is located approximately 200 feet northeast of the site and the western portion of this facility is located within the subject site's upgradient watershed. The industrial building located northwest of the site has been occupied by Langston & Woodson (general warehouse) in the mid 1880s, Southern Furniture Company in the 1890s, and Atlanta Paper from at least the mid 1910s through the late 1940s. Bonded Services utilized the building as a warehouse from the early 1950s to at least the mid 1980s. Other businesses occupied the property as well during this time and included Food Distributors and Brokers (1950s), Colorado Fuel and Iron and Company (1950s), a building supply company (1965), Dupont and Co Inc. Pigment Department (1965), Bonded Services Warehouse Shop (1965), and Solo Cup Co (1970s). This facility is located approximately 200 feet northwest of the subject site in an interpreted sidegradient to upgradient position.

Due to the long history of industrial operations at these facilities (>100 years), past likely use of regulated substances and full or partial locations in the site's upgradient watershed, these facilities are judged to represent RECs to the subject site.

5.3.2 East

The subject property is bound to the east by Hill Street. Farther east is Daddy D's BBQ, Carpet sales and installation business and a vacant lot.

Based on historical sources reviewed, properties east of the site were residentially developed until the 1940s, when the alignment of Hill Road changed. The property immediately east of the site has been vacant since that time. Properties farther east, across Hill Street have been occupied by various commercial businesses since the 1940s including a restaurant, auto repair shops, a filling station, and Atlanta Used Truck Sales. These properties are located in an interpreted sidegradient position in relation to the subject site and are not judged to represent RECs.

5.3.3 South

The subject property is bound to the south by Memorial Drive, formerly known as Fair Street. Across Memorial Drive and to the south are EDS Cook School, three vacant lots and a BP filling station. Further south are residential properties and Interstate 20.

Based on historical sources reviewed, the area across Memorial Drive and south of the subject site generally consisted of residential properties until commercial facilities began to emerge in the 1940s. An auto repair shop, and later a filling station, appears to have operated from the southwest corner of Memorial Drive and Hill Street since at least the 1960s. These businesses are considered to be environmentally suspect; however, they are located in a sidegradient position in relation to the subject site and are not judged to represent a REC.

5.3.4 West

The subject property is bound to the west by Moore Street. Farther west are Kelly's Clutch Service Company and two buildings that are currently occupied by a restaurant and office space.

According to the available historical sources reviewed, the property across Moore Street and east of the subject site was occupied by residential properties from at least the mid 1880s, until Kelly's Clutch Service Company was constructed in the early 1950s. Mr. Martin Green of Kelly's clutch indicated that all generated regulated waste is collected into drums and removed from the site by a contractor. However, Kelly's Clutch Service is judged to represent a REC to the subject site based to use of regulated substances, length of operation (>50 years) and close proximity to the site.

Properties farther west were occupied by residential dwellings (mid 1880s to early 1940s), a filling station (early 1940s to early 1950s), a confectionery (early 1950 to the late 1960s), a used car lot (mid 1950s to late 1970s), a laundry mat (late 1980s to mid 1990s), a supperette (mid 1970s to 2005), offices (late 1980s to present) and a restaurant (200-present). These properties are located in a sidegradient position in relation to the subject site and, therefore, suspect businesses that formerly operated on these properties are not judged to represent RECs.

6.0 ENVIRONMENTAL CONCERNS

Based on the findings of our Phase I Environmental Site Assessment at the subject property, we offer the following comments relative to potential environmental concerns.

6.1 ON-SITE

The subject site was not listed on the regulatory databases reviewed for our assessment.

The UST represents a REC to Parcel A of the subject site based on its potential to have leaked gasoline into the subsurface. Additionally, although limited in extent, past wire burning on site represents a potential environmental concern to the subject site based the potential for heavy metals to have leached into the subsurface.

There are no indications that the past or current uses of Parcels B or C have created environmental contamination of the site or its surroundings.

6.2 OFF-SITE

Forty-two facilities were listed within the ASTM specified search radii. The closest facility, Kelly Clutch Company, is located approximately 100 feet west of the subject site and is listed as a small quantity generator for ignitable wastes in 1988. There are no recorded violations at the facility to date. Although this facility is located in an interpreted sidegradient position in relation to the subject site, past and present uses (>50 years) of regulated substances at this property represents a REC based on its close proximity. The mattress factory facility is located approximately 300 feet northeast of the site. This facility is listed as a State Notifier based on detection of trichloroethylene in groundwater in 1998 at levels of 1,400 ppb and 130 ppb. Due to its partial location in the site's upgradient watershed, the facility is judged to represent a REC. Based on their distances and/or hydrologic positions, none of the remaining off-site facilities are judged to represent RECs relative to the subject site.

Parcel A is separated from Parcel B and C by a vacant lot. Otherwise, the subject site is surrounded by Martin Luther King Jr. Drive and a Conklin Metals Facility to the north, Hill Street and a restaurant to the east, Memorial Drive, EDS School, vacant lots and a BP Station to the south and Moore Street and Kelly's Clutch Company to the west. Historically, industrial

facilities along the railroad have existed north of the site and a school south of the site since at least the mid 1880s. Residential properties surrounded the remaining portions of the site until commercial facilities began to emerge in the 1940s.

Current and/or historical use of the properties north of the site for metal works and other types of manufacturing represents RECs to the subject site based on their long history of industrial operations (>100 years), past likely use of regulated substances and full or partial location in the site's upgradient watershed.

7.0 CONCLUSIONS

Based on the information made available to MACTEC or obtained during the assessment of the subject property, MACTEC concludes that:

- The presence of a UST on Parcel A represents a REC based on its potential to have leaked gasoline into the subsurface. However, if the UST was taken out of service prior to November 1984, only the owner or operator at the time would retain regulatory liability for a release, including off-site impacts. The current owner is only aware that the UST has not been used since his acquisition of the property in 1989. Therefore, we could not determine whether the UST was used after 1984. As such, MACTEC recommends the UST be properly closed by removal prior to acquisition of the property, if practicable, to avoid ownership of the tank and possible future liability for a historical release.
- Current and past use of the western adjacent property for car repair and past and current industrial use of the facilities to the north represents RECs to the subject site based on their proximity, full or partial upgradient position and the potential for regulated chemicals to have been released into groundwater which could have migrated onto the subject site.
- MACTEC recommends that a limited invasive testing program be conducted at the subject site to further evaluate the potential for on-site soil impacts. Based on the results of soil testing, a decision can then be made whether to check for groundwater impacts from the on-site sources. Consideration could further be given at that time to expanding any groundwater testing program to also evaluate the potential for groundwater impacts from historical off-site activities.
- MACTEC recommends that the debris observed both inside and outside the building on Parcel A be removed and properly disposed of off site, prior to acquisition of the property. An environmental professional should be contacted if any significant staining or odor is observed during their removal.

- The on-site building should be surveyed for asbestos containing materials prior to any renovation or demolition activities.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/09/2006 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

STATE AND LOCAL RECORDS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Natural Resources' Hazardous Site Inventory.

A review of the SHWS list, as provided by EDR, and dated 07/01/2005 has revealed that there are 3 SHWS sites within approximately 1 mile of the target property.

Other Pertinent Environmental Activity Identified at Site:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description of regulated substances released at the site:

This site has a known release of Trichloroethene in groundwater at levels exceeding the reportable quantity. No human exposure via drinking water is suspected from this release. The nearest drinking water well is less than 0.5 miles from the area affected by the release. Other substances in groundwater: Chloroform; Carbon tetrachloride.

Cleanup Priority: Cleanup activities are being conducted for source materials, soil, and groundwater.
EDP Directive: The Director has determined that this site requires corrective action.

Violation Status: No violations found

FINDS:

Other Pertinent Environmental Activity Identified at Site:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Waste Codes Addendum

Code	Description
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 05/05/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 07/31/2006
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 03/21/2006
Number of Days to Update: 23	Next Scheduled EDR Contact: 06/19/2006
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 05/21/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 09/04/2006
	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/09/2006	Source: EPA
Date Data Arrived at EDR: 04/27/2006	Telephone: 800-424-9346

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Centers

Source: Department of Human Resources

Telephone: 404-651-5562

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

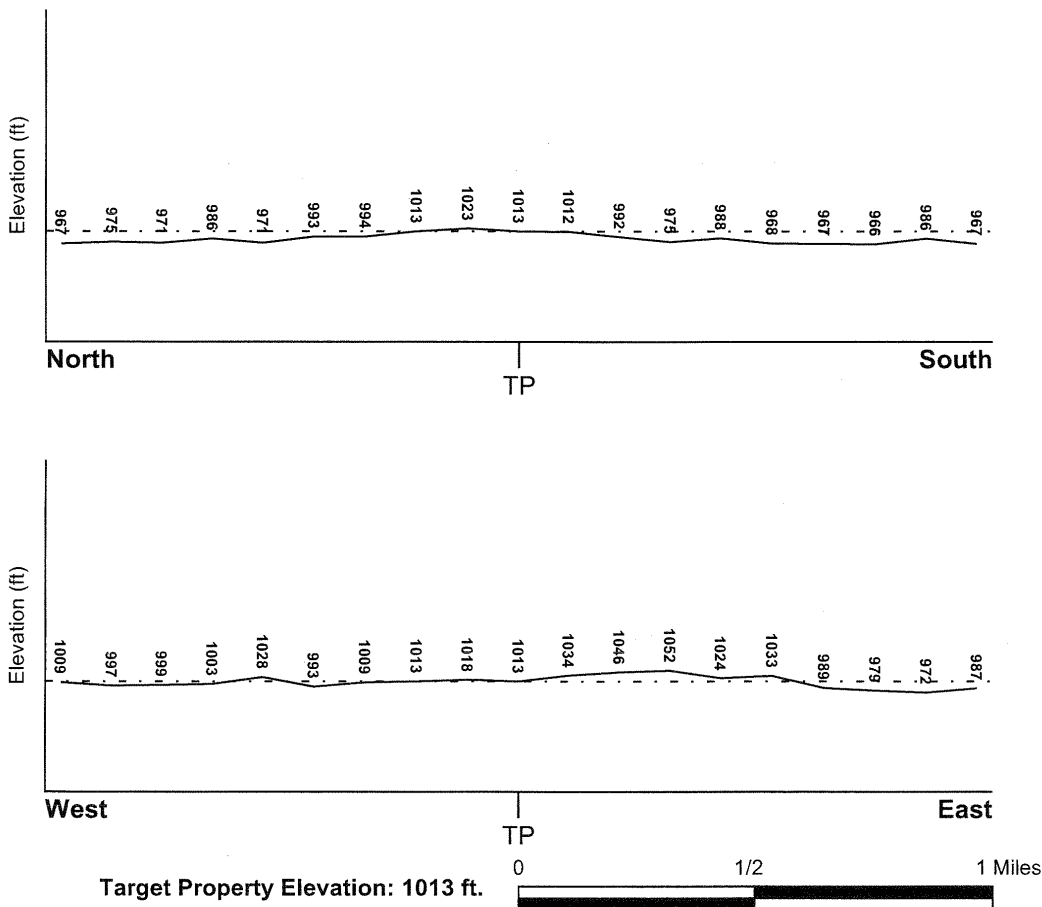

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

SOUTHWEST ATLANTA

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

17	1/2 - 1 Mile ENE	NE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Mississippian
Series: migmatite
Code: mm3 (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Metamorphic Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: sandy clay

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

AREA RADON INFORMATION

Federal EPA Radon Zone for FULTON County: 1

Note: Zone 1 indoor average level > 4 pCi/L.

: Zone 2 indoor average level \geq 2 pCi/L and \leq 4 pCi/L.

: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for Zip Code: 30312

Number of sites tested: 3

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	0.667 pCi/L	100%	0%	0%
Living Area - 2nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	Not Reported	Not Reported	Not Reported	Not Reported

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX D
SECONDARY CLIENT AGREEMENT

AGREEMENT BETWEEN SECONDARY CLIENT AND MACTEC

PROJECT: Memorial Drive Greenway Corridor Project, Block 5
217 Martin Luther King Jr. Drive and 234 & 238 Memorial Drive
MACTEC Project: 6305-06-0496.03

In consideration of the promises and obligations herein and other good and valuable consideration, the adequacy of which is hereby acknowledged by the parties, at the express request of City of Atlanta and its agent, The Atlanta Development Authority ("Primary Client"), and with full disclosure to and approval from Primary Client, MACTEC Engineering, Inc. ("MACTEC") through its subsidiaries, affiliates, branches or divisions, as an independent consultant, agrees to provide _____ ("Secondary Client"), for its benefit and use, copies of certain final reports prepared for Primary Client by MACTEC. Secondary Client may rely on the contents of those reports as reasonably necessary but only to the extent appropriate in light of any limitations placed on the scope, nature and type of MACTEC's services as stated in MACTEC's report and subject to these terms and conditions. The services provided have been performed for Primary Client and our report may or may not be suitable for all purposes of Secondary Client.

Standard of Care. MACTEC has performed its services with that degree of skill and care ordinarily exercised by reputable members of the profession practiced by MACTEC in the same or similar locality. NO OTHER WARRANTY, EXPRESSED OR IMPLIED, IS MADE OR INTENDED.

Professional Liability. Secondary Client agrees to limit MACTEC's liability to Secondary Client due to any negligent professional acts, errors, omissions or breach of contract, such that our total aggregate liability shall not exceed \$25,000 or MACTEC's total charges to Primary and Secondary Clients, which ever is greater. This limitation shall not apply to the extent prohibited by law.

Documents. Secondary Client agrees that MACTEC's report is intended for Client's and Secondary Client's exclusive reliance and internal use, and is not for general distribution or publication. Any unauthorized use or further distribution By Secondary Client shall be at Secondary Client's sole risk and without liability to MACTEC.

Conflict of Interest. By request and use of the referenced report, Secondary Client expressly agrees to waive all claims of existing or potential conflicts of interest that may now exist or hereafter arise by MACTEC's providing the requested report and acknowledges MACTEC's right to support Client if requested should any dispute arise between Client and Secondary Client.

APPENDIX E
PERSONNEL QUALIFICATIONS

CHARLES T. (CHUCK) FERRY, P.E.

Assistant Vice President

SENIOR PRINCIPAL

CAREER HISTORY

1972 - Present MACTEC Engineering and Consulting, Inc.
f/k/a Law Engineering & Environmental Services, Inc.
396 Plasters Avenue, NE
Atlanta, Georgia 30324

Specialization: Environmental, Geotechnical
Date of Hire: June 5, 1972
Years in Profession: 32
Years with MACTEC: 32

EDUCATION

Master of Science in Civil Engineering, 1984 (Georgia Institute of Technology)
Bachelor of Science in Civil Engineering, 1971 (University of Missouri-Rolla)

PROFESSIONAL REGISTRATIONS

Professional Engineer in Georgia, Florida, Alabama, Tennessee, North and South Carolina

PROFESSIONAL MEMBERSHIPS & ASSOCIATIONS

American Society of Civil Engineers (ASCE)
National Society of Professional Engineers-Georgia President 1995-96
Association of Groundwater Scientists and Engineers

CAREER SUMMARY

Mr. Ferry joined the company in 1972 and first served as a staff engineer on geotechnical design and construction projects. He became Manager of Geotechnical Services in 1979 and Manager of Environmental Services in 1987, responsible for scheduling, staffing and executing projects at the Atlanta Branch. He has served as the Chief Engineer of the Atlanta Branch from 1987 to 1992 and from 1996 to 1999, responsible for technical guidance, training and quality assurance for over 100 technical and professional employees. Mr. Ferry was designated a Senior Principle by the company's Director of Engineering in 1999.

His key strength is the application of geotechnical and geological engineering principals to the evaluation of environmental problems. Mr. Ferry has authored hundreds of reports of environmental assessments for properties throughout the United States. Mr. Ferry has authored papers and has given a number of lectures on the subject of environmental due diligence. He has been a lecturer for graduate level courses at Georgia Tech and Georgia State universities on both geotechnical and environmental subjects.

Mr. Ferry is well qualified to address both geotechnical and environmental issues related to brownfield redevelopment. A recent example is his involvement with redevelopment of the former Atlantic Steel property in midtown Atlanta, both as the geotechnical engineer of record for site redevelopment and as a key advisor on environmental impacts to the construction process.

EDUCATION

B.S., Environmental Science, 1999, Auburn University

CAREER SUMMARY

Ms. Gillies joined MACTEC in February 2005 and is currently assigned as a Staff Scientist. She has experience conducting Preliminary Environmental Site Assessment Studies for MACTEC Engineering and Consulting, Atlanta, Georgia office. Prior to joining MACTEC, she worked as a staff scientist with Tonkin & Taylor, Ltd, where she performed Environmental Site Assessments.

SUB-SPECIALTY EXPERIENCE

Environmental Site Assessment

Ms. Gillies has been involved in Preliminary Environmental Site Assessments (PESA's) for residential and commercial properties. She has performed site and area observations and has reviewed background information including historical information, regulatory lists, maps and aerial photograph checks for projects in Georgia. She has first hand experience in dealing with Federal, State and Local Regulatory offices.
